New System Activated

Ion exchange unit cleans perchlorate from water

Staff members and guests, above, view a new ion exchange treatment system at Lincoln Avenue Water Co.'s Olive Avenue facility in Altadena on Thursday.

At left, Robert Hayward, right, general manager, explains the system to Frederick Gregory, NASA deputy administrator. The system removes perchlorate contaminating the water supply. It was unveiled Thursday by the Lincoln Avenue Water Company at its Olive Avenue central treatment plant. The water company leases the unit from NASA.
